

Contents

Bridges, Roads, Tunnels, Construction of Transport Infrastructure Facilities

Wide Span Segmented Precast Concrete Girders	3
Klaus Holschemacher, Stefan Käseberg, and Lars Hoffmann	
Early Cost Estimates of Bridge Structures Aided by Artificial Neural Networks	10
Michał Juszczak	
The Study of the Effect of Heat Mains Laid in the Automobile Road Embankment Pavement on Its Base	21
Sergey Kudryavtsev, Tatiana Valtceva, Zhanna Kotenko, Anastasiya Peters, Vyacheslav Shemyakin, Yuliya Bugunova, and Natalya Sokolova	
Application of RFID Technology on Construction Site – Case Study . . .	29
Marcela Spisakova and Maria Kozlovska	
Nature of Seismic Hazard of Mainlines' Functioning in the Conditions of Sredneamurskaya Lowland North Offset	37
Dmitriy Maleev, Victor Shabalin, Sergey Kvashuk, and Vlad Trapeznikov	
Soil Research for Strengthening Railroad Bed Design in Cold Regions of Far East	49
Svetlana Zhdanova, Arkadii Edigarian, Nikolai Gorshkov, and Oksana Neratova	
New Designs of Drainage and Discharge Facilities for Dewatering Endorheic Sections in Cold Regions	60
Svetlana Zhdanova, Arkadii Edigarian, Oksana Tukmakova, and Oksana Neratova	

Asphalt Concrete Mix Temperature Change Dynamics During Compaction	71
Evgenij Shishkin and Sergej Ivanchenko	
Geodetic Monitoring for the Construction of Railway Bridge Piles	81
Andrey Nikitin and Arkadii Edigarian	
Improvement of the Calculation of the Floating Bridge Hinge System of the Two Supporting Ferry	89
Dmitry Tryapkin and Yuriy Tryapitsin	
Measurement Method of the Reflected from Highways Noise in Urban Buildings	100
Aleksandr Golovko, Vladimir Ledenev, and Aleksandr Antonov	
Sandwich Belt High-Angle Conveyors in Solving the Transportation Problems of Deep Open Pits	110
Konstantin Pozynich, Svetlana Telnova, and Evgeny Pozynich	
Service-Life Evaluation of Reinforced Concrete Sleepers Under Various Working Conditions	125
Nikolay Karpushchenko, Dmitriy Velichko, and Pavel Trukhanov	
Porosity and Strength of Limestone Treated with Stone-Strengthening Composition	142
Elena Komeeva, Anna Babanina, and Vitaly Lukinov	
Artificial Intelligence for Managing Small Hydro Power Plants in Southern Regions of Siberia	154
Mikhail Noskov, Liliia Tolstikhina, and Natalia Frolenko	
Justifying and Opting Lightweight Railway Superstructure	167
Oleg Suslov and Alena Balyaeva	
Switching Shunters on a Slab Base	175
Vadim Korolev	
Research of the Stress-Strain State of the Building Foundation Artificial Basis on the Weak Soils of Sakhalin Island	188
Sergey Kudryavtsev, Tatiana Valitseva, Zhanna Kotenko, Anastasiya Peters, Vyacheslav Shemyakin, Yuliya Bugunova, and Natalya Sokolova	
Automation of Railroad Construction Technology Using Surveying Methods	199
Vladimir Shcherbakov, Alexander Karpik, and Marina Barsuk	
Perspective Constructions of Bridge Crossings on Transport Lines	209
Alexey Loktev, Vadim Korolev, Irina Shishkina, Liliya Illarionova, Daniil Loktev, and Ekaterina Gridasova	

Method for Detecting Fatigue Damage to Bridges by Analyzing Dissipative Processes in Metals Under Periodic Loading	219
Leonid Solovyev and Alexander Solovyev	
Stability of the Supporting Subgrade on the Tracks with Heavy Train Movement	228
Sergey Akimov, Sergey Kosenko, and Svetlana Bogdanovich	
Measurement Method of Non-continuous Noise in Industrial Buildings of Railway Enterprises	237
Aleksandr Golovko, Vladimir Ledenev, and Aleksandr Antonov	
Operational Reliability and Durability of Roads with Cement Concrete Coatings	249
Sergey Efimenko, Yuliya Kuznetsova, Natalya Taldonova, Dmitry Sarkisov, and Olga Zubkova	
Physical and Mechanical Characteristics of Soil Within the Culvert Pipes Location of Roads	257
Valery Vorobyov, Elena Karelina, and Natalya Shcherbakova	
Influence of Temperature and Soil Thermal Expansion on Cracking of Dirt Road Surface During Seasonal Freezing	268
Timmo Gavrilov, Gennady Kolesnikov, and Tatiana Stankevich	
Dependence of Trapping Nets' Protective Properties on Structural Layout	277
Victor Brodskiy	
Capture of Large Objects by the Earthmoving Machine's Implement During Operation on Motor and Toting Roads	285
Altynbek Kaukarov, Natalia Kokodeeva, Andrey Kochetkov, Leonid Yankovsky, and Igor Chelpano	
Method for Estimating Tensile Stresses and Elastic Modulus of Frozen Soil with Evolving Crack	296
Gennady Kolesnikov and Timmo Gavrilov	
Finishing Coatings Based on Modified Cement Colloidal Systems	306
Evgeniya Tkach	
Strengthening of Concrete Composites Using Polycarboxylate and Aluminosilicate Materials	316
Galina Zimakova, Elena Kasper, and Olga Bochkareva	
Bending and Eccentrically Compressed Reinforced Concrete Structures at Low and Freeze-Thaw Temperatures	329
Valeriy Morozov, Vladimir Popov, Mikhail Plyusnin, and Lidia Kondrateva	

Information Model of Multivariate Technological Design of Earthworks	339
Baatr Abushaev	
Typology of Passenger Railway Stations in the Late 19th – Early 20th Centuries (Russian Experience)	345
Milena Zolotareva	
Development of a Control System for the Transportation of Asphalt Mix with the Maintenance of the Required Temperature ...	354
Khizar Dzhabrailov, Mikhail Gorodnichev, Rinat Gematudinov, and Milana Chantieva	
Fire Simulation of Bearing Structures for Natural Gas Module Plant	365
Marina Gravit, Sergey Zimin, Yuriy Lazarev, Ivan Dmitriev, and Elena Golub	
Choosing Methods for Manufacture of Reinforced Concrete Frames Based on Solution of Optimisation Problems	377
Igor Serpik and Inna Mironenko	
Method of Evaluation of Historical Objects of Transport Infrastructure Deformations	387
Olga Tsareva, Yanis Olekhovich, and Elena Razumnova	
The Rock Loosening Technology in Railway Track Reconstruction ...	405
Aleksandr Leshhinskij, Evgenij Shevkun, and Evgenij Shishkin	
Mathematical Methods for Optimizing the Technologies of Building Materials	413
Aleksey Zhukov and Ekaterina Shokodko	
Current State of Intellectual Property Management and Innovative Development of the Russia	422
Elena Voskresenskaya, Lybov Vorona-Slivinskaya, and Lybov Achba	
Boundary Layer of the Wall Temperature Field	429
Tatiana Musorina, Olga Gamayunova, Mikhail Petrichenko, and Elena Soloveva	
Calculation and Strengthening of Reinforced Concrete Floor Slab by Composite Materials	438
Vladimir Rimshin and Pavel Truntov	
State and Prospects of Development of Self-regulation in Construction Industry of Russia	446
Elena Voskresenskaya, Lybov Vorona-Slivinskaya, and Yuriy Kazakov	

Study of Deformation of Structural Elements as Result of Concrete Creep	453
Nikita Maslennikov, Aleksander Panin, Alexej Semenov, and Vjacheslav Kharlab	
The Influence of Green Roofs on a Humanitarian Balance of the Biotechnosphere	462
Elena Sysoeva and Margarita Gelmanova	
The Influence of Polyethylene Additives on Asphalt Pavement Properties	476
Sergey Zakharychev, Konstantin Pozynich, and Svetlana Telnova	
Identifying the Positioning Systems in Conditions of Insufficient Primary Measurement Information	485
Anton Lankin, Valeriy Grechikhin, and Stanislav Gladkikh	
Algorithmic and Software Optimization Approach for Diagnosis of High-Precision Positioning Systems	497
Stanislav Gladkikh, Valeriy Grechikhin, and Anton Lankin	
Study of the Characteristics of Fine Binders for Injection in Construction	507
Alekseev Vyacheslav and Sofia Bazhenova	
Modification of Polyimide Surface in Multilayer Structures for Architectural Films by Plasmochemical Treatment	517
Vladimir Sleptsov and Tatyana Revenok	
Effect of Additives on the Properties of Fine-Grained Concrete	526
Olga Bazhenova	
Selection of the Variant of the Aluminium-Glass Facade Implementation Using the AHP Method	536
Agnieszka Leśniak, Damian Wieczorek, and Monika Górka	
Development of Polymer Composite Facing Material Using Anthropogenic Waste	544
Anastasiya Torlova, Irina Vitkalova, Evgeniy Pikalov, and Oleg Selivanov	
Development of Facade Facing Ceramics with Self-Glazing Effect and Increased Energy Efficiency	552
Anastasiya Torlova, Irina Vitkalova, Evgeniy Pikalov, and Oleg Selivanov	
Experimental Research of the Strength of Compressed Concrete Filled Steel Tube Elements	560
Anatoly Krishan, Vladimir Rimshin, and Evgeniya Troshkina	

Exploitation Characteristics of the Constructions of Transport Buildings and Structures Under Dynamic Loads	567
Mikhail Berlinov	
Transport Management, Intelligent Transport Systems	
Assessment of Media-Forming Potential of the Territory in the Implementation of the Lands	577
Elena G. Chernykh, Alexander P. Sizov, Olga V. Bogdanova, and Tamara V. Simakova	
Urban Transport and Logistics Infrastructure as an Element of Economic Security in the Region	589
Zoya Mejokh, Nadezhda Kapustina, Diana Kakhrianova, Anastasia Safronova, and Anastasia Yussuf	
Comparative Risk Analysis of Using the Markings for Ground and Raised Pedestrian Crossings	598
Victor Stolyarov, Natalya Schegoleva, Andrey Kochetkov, Victor Talalay, and Yuri Vasiliev	
Features of Personnel Reproduction in the Transport Industry	606
Viktoriya Vinichenko	
Fuzzy Set Theory for Planning the Operation of a Motor Transport Enterprise	617
Liudmila Trofimova	
Modeling as a Source of Innovation in Design Railway	627
Gennady Akkerman, Sergey Akkerman, and Dmitriy Kargapol'tsev	
Coordination of Parameters of Transportation System Elements	633
Elena Timukhina, Oleg Osokin, Vadim Permikin, and Anton Koshcheev	
Integral Evaluation of Business Success: Methodology and Case of Russian SME	643
Dmitri Pletnev and Ekaterina Nikolaeva	
Trends in the Development of Corporate Ethics in the Company "DHL" and JSC "Russian Railways" in the Current Socio-Economic Conditions	657
Vladimir Persianov, Elena Rudakova, Anastasia Safronova, Alla Semenva, and Nadezhda Pilipchuk	
Efficiency of the Production Process of Grinding Rails on the Basis of Optimizing the Periodicity of Works	672
Andrey Ilinykh, Alexey Matafonov, and Elena Yurkova	

Impact of the Use of Intellectual Assets on the Economic Growth of Russian Railways	682
Tatyana Vladimirova and Irina Chistyakova	
Bases of the Methodology of Monitoring the Impact of the Human Factor on the Reliability of the Railway Infrastructure	691
Valery Vorobyov, Aleksey Manakov, Irina Yanshina, and Irina Repina	
Lean Transportation in Science is no Longer "Terra Incognita"	707
Valeriy Kurganov, Vasilii Say, Aleksey Dorofeev, and Vladimir Mukaev	
Economic and Investment Fields of Railroad Sections and Stations	720
Gennady Akkerman, Sergei Akkerman, and Boris Sergeev	
Public Finance Policy for the Development of the Transport Industry	729
Elena Duplinskaya and Yuliya Chepiga	
The Multi-level Model of the Service Enterprises Human Capital Value	738
Oksana Pirogova and Vladimir Plotnikov	
Structural Diagram of an Automated System of Material Moisture Content Control	748
Sergey Morozov, Konstantin Kuzmin, Igor Pavlov, Vladimir Reut, and Elena Kochurina	
Mathematical Modeling of Gas and Water Cone Formation at an Oil Well	758
Djavanshir Gadjeiev, Ivan Kochetkov, and Aligadzhi Rustanov	
Decision Support System for Road Transport Management in the Digital Age	773
Gennady Akkerman, Alexander Buynosov, Aleksey Dorofeev, and Valeriy Kurganov	
Economic and Mathematical Evaluation Model of Interaction Between Container Transportation System and Russian Regions	782
Daria Kochneva, Vasilii Say, and Sergey Sizi	
Algorithmization of Decision-Making in the Construction of Logical Structures of Databases of Functional Information Systems	791
Vladimir Kulikov	
Determination of Factors of Professional Health Risk of Engineering Workers	799
Ekaterina Trushkova and Elena Omelchenko	

Application of Cosinor Analysis for Modeling Time Series of Traffic Accidents	807
Irina Buslaeva	
Economic Optimization and Evolutionary Programming When Using Remote Sensing Data	816
Roman Shamin and Aleksandr Semenov	
Development of the General Structure of the Knowledge Base for Neuro-Fuzzy Models	824
Andrey Kopyrin, Evgeniya Vidishcheva, and Irina Makarova	
Modernization Concept of the Electric Power Industry as the Basis for Ensuring the Economic Growth of the Russian Federation	832
Ekaterina Nezhnikova, Maxim Chernyaev, Yuliana Solovieva, and Anna Korenevskaya	
Forming Ontologies and Dynamically Configurable Infrastructures at the Stage of Transition to Digital Economy Based on Logistics	844
Sergey Barykin, Stanislav Gazul, Vladimir Kiyaev, Olga Kalinina, and Vladimir Yadykin	
Methodical Apparatus for Selecting the Best Motor Transport Vehicle by the Set of Its Characteristics	853
Petr Romanov and Irina Romanova	
Control of Idle Losses in Power Transformers of Distribution Electric Networks	865
Evgeny Tretyakov and Vasily Cheremsin	
Financial Analysis in Budgetary Institutions	874
Larisa Gerasimova	
Freight and Logistics, Traffic Modelling	
Modelling the Bottlenecks Interconnection on the City Street Network	889
Oleksandr Stepanchuk, Andrii Bieliatynskyi, and Oleksandr Pylypenko	
Safe Train Route Options	899
Vladimir Popov, Philipp Sukhov, and Julia Bolandova	
Elaboration of Multichannel Data Fusion Algorithms at Marine Monitoring Systems	909
Andrey Makshanov, Anton Zhuravlev, and Lyubov Tyndykar	
Monitoring and Predicting the State of the Road Network in Russia's Cryolitic Zone	924
Anatolii Yakubovich, Stepan Mayorov, Dmitry Pyatkin, and Irina Yakubovich	

Capacity and Traffic Management on a Heavy-Traffic Railway Line . . .	934
Viktor Zubkov, Ekaterina Ryazanova, Evgenia Chebotareva, Maxim Bakalov, and Alexey Gordienko	
Methods of Rating Assessment for Terminal and Logistics Complexes	950
Oksana Pokrovskaya and Roman Fedorenko	
Application of Conditional Spectra for Modeling Noise Propagation Ways	960
Igor Pimenov and Aleksandra Kuznetsova	
Method of Two-Factor Analysis of Cars Operation in the Road Transport System of Cargo Transportation	968
Elmira Aytbagina and Evgeniy Vitvitskiy	
Analysis and Diagnostics of Competing Transport Processes on the Basis of the Bernstein – Russell – Narinyani Theorem	975
Ivan Andronchev, Sergey Nikishchenkov, and Valery Khaitbaev	
Evaluation Model of Interaction Between Container Transport System and Regional Economy	985
Daria Kochneva and Vasilij Say	
Organization and Movement of Exit Routes from Empty Cars	999
Olga Frolova, Valentina Shirokova, Tatyana Kalikina, and Irina Melnik	
Conditions for Driving of the Connected Trains on the Operating Domain of Far Eastern Railroad	1011
Nataliya Kuzmina, Valentina Shirokova, Tatiana Odudenko, and Yuliya Agapova	
Reliability of Multimodal Export Transportation of Metallurgical Products	1023
Vasily Sai, Valery Kurganov, Mikhail Gryaznov, and Alexey Dorofeev	
The Methodology of Calculating Route Network of Long-Distance Passenger Trains in the Conditions of Fluctuating Passenger Flows . . .	1035
Yury Pazoysky, Tatiana Kalikina, Maxim Saveliev, and Elvira Kurtikova	
The Optimizing Container Transportation Dynamic Linear Programming Model	1043
Elena Korchagina, Andrey Bochkarev, Pavel Bochkarev, and Sergey Barykin	
Theoretical and Multiple Model of Transport Multi-operational Reconfigurable Processes	1054
Ivan Andronchev, Sergey Nikishchenkov, and Polina Romanova	

Optimization of Fleet Size and Structure While Serving Given Freight Flows	1064
Petr Kozlov, Oleg Osokin, Elena Timukhina, and Nikolay Tushin	
Elaboration of a Model of Integrated Transport Service in the Segment of Freight Transportation	1076
Alexander Galkin, Nina Sirina, and Valery Zubkov	
Analysis of the Error in Determining the Location Inside the Logistics Warehouse Complexes	1086
Elena Kokoreva, Anatoliy Kostyukovich, and Ilya Doshchinsky	
Research of the Incoming Traffic Flow at City Intersections on the Suitability of the Use of Adapted Traffic Light Control	1095
Roman Andronov and Evgeny Leverents	
Analytical Model of Commercial Activity of a Transport-Logistics Enterprise	1102
Nikolay Tushin, Andrey Chumakov, and Kirill Timukhin	
Improvement of Cargo Transportation Technology in Rail and Sea Traffic	1110
Valeriy Zubkov and Nina Sirina	
Main Parameters and Placement of the “Warehouse on Wheels” Terminals of Seaports for Transshipment Coal	1120
Nikolay Kostenko, Anna Kostenko, and Ekaterina Mikhola	
Coordination of Parameters of Transport Elements System in the Conditions of Lack of Traffic and Estimated Capacity	1133
Elena Timukhina, Oleg Osokin, Nikolay Tushin, and Anton Koshcheev	
Construction of Efficient Railway Operating Domains Based on a Simulation Examination	1143
Andrey Borodin, Petr Kozlov, Vitaly Kolokolnikov, and Oleg Osokin	
Logistics Grading of Railroad Stations	1152
Oksana Pokrovskaya	
Modeling of a System for Organization of Traffic via a Terminal Network	1162
Oksana Pokrovskaya, Roman Fedorenko, and Elena Khramtsova	
A Model of Cluster-Modular Development of Passenger Traffic in the Urals Federal District, Russia	1176
Valery Samuylov, Mikhail Petrov, and Tatyana Kargapol'tseva	

Dangerous Zone During Transportation of Dangerous Goods by Rail	1186
Vladimir Medvedev, Zakhar Oshchepkov, Ekaterina Bogomolova, and Vladislav Bogomolov	
Author Index	1197
